A 974 S

Za vozila:

- Volkswagen Polo (9N3) 05.05->;

Dolžina metlic: 530mm/475mm.

Slika je simboli?na.

## Galerija izdelka

**EVODUM spring strip**

Offers better wiping quality thanks to the alignment of the Evodum spring strips to the corners of the vehicle's windshield.

Further wiping quality thanks to the equal distribution of the wiper blade pressure on the vehicle's windshield.

**Two-material technology**

Blades are easy to change and do not require an adapter. The improved rubber spine and micro-edge will ease operation.

**Hard rubber double micro-edges**

This ensures an efficient wiping action, so even the smallest micro-drops are removed from the windshield. This is due to the increased stability of the wiper's rubber lip.

**Innovative side-lock**

Blades are easy to change and do not require an adapter.

- Improved Wiping
- No fit out
- Single installation
- Manufactured to Original Equipment specifications
- Product program includes wiper blade lengths 300-800mm
- Improved suitability for winter operation
- Aero-dynamic design
- Innovative design due to the integrated aerodynamic spoiler
